Legazpi City, Albay • 09456678225 • johnjaymaralvarez@gmail.com • jj-hello-world.netlify.app

SUMMARY

Results-driven IT graduate specializing in video editing, graphic design, and UI/UX design, focused on creating visually compelling and user-centered digital experiences. Passionate about transforming ideas into impactful content while collaborating with creative teams to deliver high-quality, engaging solutions.

EDUCATION

STI College Legazpi | 2022 - Present

Bachelor of Science In Information Technology

WORK EXPERIENCE

Technical Support Intern | Bicol Regional Hospital & Medical Center| 2026

- Resolved 50+ IT support tickets across 20+ hospital departments covering software troubleshooting, HOMIS system administration, and hardware repair, ensuring minimal downtime and uninterrupted hospital operations.
- Implemented network cabling, telephone line setup, and peripheral installations across multiple departments, improving connectivity and overall IT infrastructure reliability.

Freelance Video Editor | UGC Contents & Meta Ads | 2025-2026

- Produced high-performing UGC video ads for Meta campaigns, achieving a 3.22% CTR and 3.66 ROAS on a \$348.80 ad spend.
- Edited and delivered a winning Meta ad creative that directly generated 24 purchases, driving measurable revenue growth for the client.

Work Immersion | San Roque Barangay Hall | 2021 - 2022

- Organized documents and assisted in healthcare seminars and community events, improving administrative efficiency and event coordination.
- Supported barangay staff in daily operations and logistics, contributing to smoother delivery of community services.

PROJECTS

Interactive 3D Furniture Customization & Order Management System | Capstone Project | 2024 - 2025

- Architected a web-based 3D furniture customization platform integrated with inventory and order monitoring, streamlining order processing for Willy's Lumber.
- Enhanced customer engagement by implementing interactive 3D visualization and structured data flow, reducing friction in the purchase decision process.

Personal Portfolio Website | 2022 - 2023

- Built and deployed a responsive personal portfolio website using HTML, CSS, and JavaScript, improving online presence and making projects more accessible to potential employers.
- Showcased academic and design projects through a structured and visually appealing interface, increasing accessibility and strengthening professional credibility online.

Car Rental System | Academic Project | 2022 - 2023

- Developed a database-driven car rental application using Java and MySQL, streamlining the management of rental records and improving data organization.
- Designed a structured MySQL database schema with Java-based backend functionality, enabling efficient rental record processing and system reliability.
